

Marlow Explorer 97

Built to your specifications, 5-7 staterooms, Cruise at 24 knots!

My goal with this yacht is to provide the living space of a 100 footer without giving up "fast passage making" ability and maintaining the shallow draft required for cruising the Bahamas - David Marlow

When you make the jump from 60'-80' feet up to 100' many owners find they have changed more than they wanted to. The Marlow 97 maintains less than 6' draft and will cruise at 20+ knots fully loaded. Her full walk around side decks and clean sight lines let a crew of 2 run her just fine. Many vessels in this class draw too much to cruise where you want to go and are very slow and inefficient—not the Marlow 97.
