

Marlow Explorer 70E MKII

Quality, Versatility, Performance, Value

"The 70E MKII matured from the original 65C; the first Marlow built in 2001. Many say she is the perfect size personal yacht" - **David Marlow**

Why compromise when you can have everything you want. The Marlow 70 series gives you better range than a slow trawler while providing very fast passage making capabilities; with the ability to do 20+ knots for over 500 miles. All this capability while still offering you the flexibility to build the layout that suits your cruising style and personal tastes. Our own state of the art factory and proprietary manufacturing techniques let us provide this at a lower cost than any yachts in our class.

Marlow 70
